

# Save Energy - Save Money

## Ventilation on Demand

### Are Your Existing Systems...

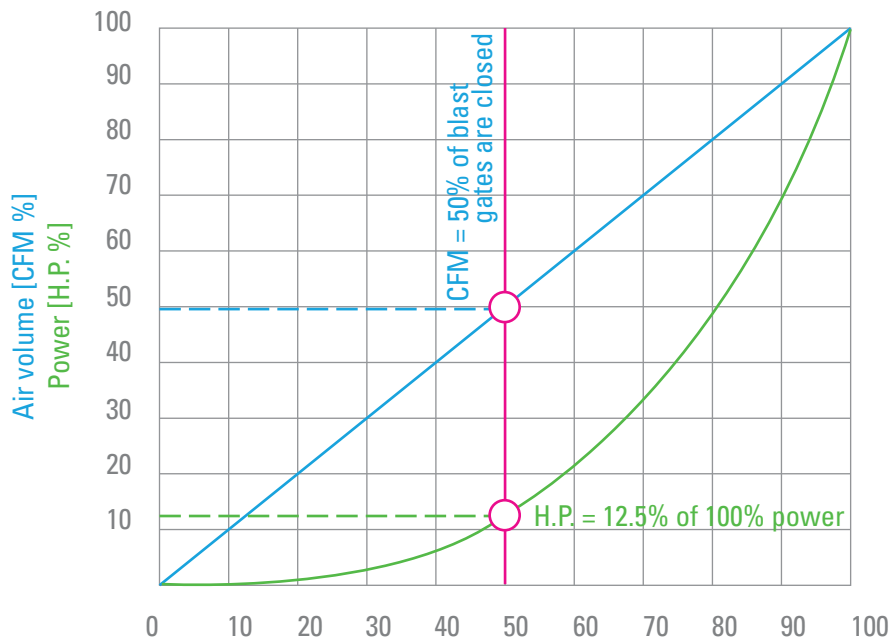

Undersized?  
Overworked?

### Your New Systems Could...

Be Smaller,  
Call For Less Horse Power,  
Operate More Efficiently,  
Require Less Maintenance,  
Function More Intelligently

New systems can be designed smaller.  
Conventionally designed systems have  
capacity for future expansion.

### Energy savings - H.P. vs. %CFM

Reducing required air volume by 50% reduces necessary fan energy to 12.5%.
