

Sliding Balancer Track – SBTA **PLYMOVENT**[®]

INTELLIGENT PROCESS VENTILATION™

SBTA for vehicles utilizing same door exit and entry.

The SBTA has set the standard in vehicle emissions control for fire and emergency response vehicles the world over.

The SBTA is best suited for vehicles that back-in to a service bay and respond out the same door. If you are looking for an exhaust removal system that you can connect at the door before backing in and have it automatically disconnect when you leave. The SBTA is right for your application.

Features and Benefits

- Models to handle up to 9 m/29.5 ft deep back-in bays
- Auto-disconnect at the exit door
- Attach the Grabber[®] nozzle from a standing position
- No minimum exit speed
- Available in sizes to fit all emergency response vehicle tailpipe sizes

PlymoVent reserves the right to make design and technical changes.
